

How to make vellum paper

what you will need:
a wax dinner candle (white)
an iron

parchment paper (to protect iron surface)
copy paper or other scrap paper (to blot wax)

1. cut out the image at right
2. cover image with parchment to protect
3. with a hot iron, iron image until paper is heated
4. remove parchment and quickly rub image with wax candle on edge until wax melts
5. you may have to re-heat the image several times to transfer enough melted wax to image
6. use copy paper to cover and blot off any shiny spots of extra wax (remember to protect your iron with parchment placed on top of copy paper and image)
7. let cool
8. your image is now transparent
9. use to cover any page as a decoration or use alone
10. be careful with hot wax (melts very fast)
